

Fiber Laser Machine

Technical Parameters

Laser power : 20W, 30W, 50W
Laser source : MAX/JPT/RAYCUS
Laser wavelength : 1064nm
Q-switch frequency : 20kHz - 100kHz
Optical quality : M2s1.4
Marking field : 110*110/ 150*150/ 200*200
Minimum line width : 0.01mm
Minimum character : 0.1mm
Marking speed : 0-10000mm/s
Repeat accuracy : 0.01mm
Cooling way : Air cooling
Input power : Ac220±10%Hz(60Hz)
Power of machine : 500W
Lifetime : 100,000 hours(if properly operated)
Machine size : 800*650*1520mm

Address - G 92, Sector 63, Noida (201301)

UV Laser Machine

Technical Parameters

Laser source : JPT/ DXT

Laser power : 3w,5w

Laser wavelength : 355nm

Applicable material : Non-metals, Glass, Crystal,
Plastics, PCB boards etc.

Working area : 110*110mm, 150*150

Marking speed : 12000mm/s

Working accuracy : 0.001mm

Repeatable frequency : 20Hz-200kHz

Min. line width : 0.01mm

Cooling mode : water cooling

Control system : JCZ

Laser head : onya

Laser life : 25,000 Hrs.

Working voltage : AC220/50Hz
