

UV Laser Machine

Technical Parameters

Laser source : JPT/ DXT

Laser power : 3w,5w

Laser wavelength : 355nm

Applicable material : Non-metals, Glass, Crystal,
Plastics, PCB boards etc.

Working area : 110*110mm, 150*150

Marking speed : 12000mm/s

Working accuracy : 0.001mm

Repeatable frequency : 20Hz-200kHz

Min. line width : 0.01mm

Cooling mode : water cooling

Control system : JCZ

Laser head : onya

Laser life : 25,000 Hrs.

Working voltage : AC220/50Hz
